Experience

Open Source Contributions

Ongoing

For the last two years I contributed to various open source projects like vcpkg and imnodes.

Education

Addis Ababa University/ B.S in Software Engineering

September 2019 - June 2024, Addis Ababa Ethiopia

- Major: Software Engineering (3.96 GPA)
- Coursework in Data Structures & Algorithms, OOP, Fundamentals of Database and Applied Engineering Mathematics

Projects

Afro

January 2021 - Ongoing

[Afro | GitHub](#)

A procedural material creating software for 3D graphics - My hobby side project.

- The project is a Texture Synthesizing Software, It uses the GPU to apply different filters to a base texture.

Store Management System

July 2021 - September 2021

[Store Management | GitHub](#)

A small store management software project - Developed as part of my Fundamentals of Database course.

- The project is a store management software aimed at small stores. It enables you to keep track of sales and stocks.
- I used JavaFX for the client and a MySQL server for the database,
- Mainly focuses on applying fundamental database concepts.

Libra

November 2021 - Ongoing

An assignment submission system group project - Being developed as part of my Software Engineering coursework. I will be part of the frontend team.
